

FRAMED CANVAS

The Artist Canvas is specially made for photographic printing, creating a stunning look with brilliant colors. The superior quality canvas shows texture and remarkable detail. When combined with museum quality framing in the latest designs, this display option is sure to enhance any room in your home or office.

Canvas prints are a standard in the art industry and are widely embraced for their astonishing quality by major museums, galleries, publishers and artists. The latest inks offer more than 80 years light-fastness and UV-resistance under museum archival conditions. For even better performance, we coat all our canvas prints with a layer of anti-fading UV protective clear satin glaze.

The image is printed on textured Artist Canvas, which is a 100% acid free, double-weave cotton/polyester blend canvas characterized by superior image quality, excellent color brilliance, saturation and resolution. Artist Canvas is an excellent choice for fine art reproductions and high resolution photographic displays.

The printed image is framed with museum quality framing materials, including a fabric covered wood liner. The image is finished with a fine wood moulding chosen from an extensive array of styles, stains and finishes. Framed canvas images do not include glass or acrylic. Framing standards are selected by our certified professional framers to complement each limited edition photograph. Custom framing options are available to accommodate your personal taste or décor.

The framed canvas comes ready to hang on a wall buddies® hanging system. Every image is meticulously inspected to meet Mangelsen's exacting standards, with a lifetime workmanship guarantee.

All Mangelsen limited edition photographs are assigned a unique number and hand-signed by the artist. Each photograph includes a certificate of authenticity. Framed canvas images ship protected in high quality, sturdy packaging or wooden crates and are shipped fully insured to your home or office.
